**Center for the Study of Democracy (The Group)**

**Consolidated Annual Financial Statements**

**31 December 2020**

## **Independent Auditor's Report**

To the General Assembly  
of the Center for the Study of Democracy

### **Report on the Consolidated Financial Statements**

We have audited the consolidated financial statements of the Center for the Study of Democracy, Sofia, and its consulting arms Vitosha Research EOOD and Project 1 EOOD (together referred to as the "Group"). These comprise the consolidated statement of the Group's financial position as of 31 December 2020 and the consolidated statements of comprehensive income, changes in equity and cash flows for the year then ended, as well as a summary of significant accounting policies and other explanatory notes.

### **Opinion**

In our opinion, the accompanying consolidated financial statements present fairly, in all material respects, the financial position of the Group as of 31 December 2020, its financial performance and its cash flows for the year then ended in accordance with the International Financial Reporting Standards (IFRS) as adopted by the European Union.

### **Basis for expression of opinion**

We have performed our audit in accordance with the International Standards on Auditing (ISA). Our responsibilities as per these standards are further described in the Auditor's Responsibility section of our report. We are independent from the Group in accordance with the Code of Ethics for Professional Accountants of the International Ethics Standards Board for Accountants (The IESBA Code) along with the ethical requirements of the Law on the Independent Financial Audit (LIFA), applicable to our audit of consolidated financial statements in Bulgaria. We have also complied with our other ethical responsibilities as per the requirements of LIFA and the IESBA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

### **Other information, different from the Consolidated Financial Statements and the auditor's report**

The Group's management is responsible for other information. Other information comprises the report on the activity prepared by the management in accordance with Chapter Seven of the Law on Accountancy of the Republic of Bulgaria, but excludes the consolidated financial statements and our auditor's report.

Our opinion regarding consolidated financial statements does not comprise this other information and we do not express any form of conclusion about its reliability, unless it is explicitly stated in our report and to the extent to which it is stated.

In auditing consolidated financial statements, our responsibility is to read the other information and thus to assess whether this other information is substantially inconsistent with consolidated financial statements or with our knowledge obtained during the audit, or in another way appears to contain material misstatement. If, based on the work we have performed, we conclude there is material misstatement in this other information, we are required to report this fact.

We have nothing to report in this respect.

### **Supplementary reporting requirements laid down in the Law on Accountancy of the Republic of Bulgaria**

In addition to our responsibilities and reporting in compliance with ISA, in reference to the report on the activity we have followed the procedures supplementing ISA requirements as per the Instructions of the professional organisation of certified public accountants and registered auditors in Bulgaria – Institute of Certified Public Accountants (ICPA) – issued on 29 November 2016 and endorsed by its Managing Board on 29 November 2016. These are procedures on verification whether such other information is present and on examination of its form and content, designed to assist us in forming an opinion on whether this other information contains the disclosures and reports laid down in Chapter Seven of the Law on Accountancy.

### **Opinion in reference to Art. 37, Para. 6 of the Law on Accountancy of the Republic of Bulgaria**

On the grounds of the procedures implemented, our opinion is that:

- a) The information included in the report on the activity for the financial year for which consolidated financial statements were prepared corresponds to the consolidated financial statements.
- b) The report on the activity was prepared in compliance with the requirements of Chapter Seven of the Law on Accountancy.
- c) The report on payment to governments for the financial year for which consolidated financial statements was prepared was presented and prepared in compliance with the requirements of Chapter Seven of the Law on Accountancy.

### **Management's responsibility for the Consolidated Financial Statements**

The management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with International Financial Reporting Standards as adopted by the European Union, and for such internal control as the management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

During the preparation of consolidated financial statements, the management is responsible for evaluating the ability of the Group to continue its operation as a going concern, disclosing, when applicable, issues related to the assumption about a going concern and using the accounting basis on the grounds of the assumption about a going concern, unless the management has the intention to liquidate the Group or to suspend its activity, or has no other alternative but to take such action.

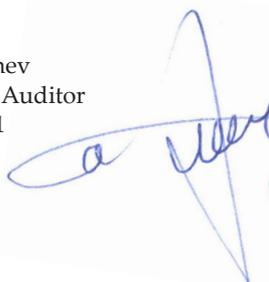

## Auditor's responsibility

We aim to obtain reasonable assurance that the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report containing our auditor's opinion. Reasonable assurance is a high degree of assurance, but is not a guarantee that an audit performed in accordance with ISA shall in all cases reveal material misstatement if such misstatement is present. Misstatements may arise as a result of fraud or error and are considered material if it would be reasonable to expect that, independently or in aggregate, they could impact the economic decisions of consumers taken on the basis of these financial statements.

As part of the audit complying with IAS, we use professional judgment and keep professional skepticism throughout the audit. We also:

- identify and assess the risks of material misstatement in the consolidated financial statements, whether due to fraud or error; we design and perform audit procedures in response to these risks, and we obtain sufficient and appropriate audit evidence, so as to provide basis for our opinion. The risk of not revealing material misstatement which is due to fraud, is higher than the risk of not revealing material misstatement which is due to error, as fraud could vary from secret arrangement, through forgery, intentional omissions and statements aiming to deceive the auditor, to internal control neglect or circumvention;
- consider internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control;
- evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and the related statements made by management;
- make a conclusion about the appropriateness of the accounting basis used by management on the grounds of the assumption for a going concern and the audit evidence obtained about whether material uncertainty is present concerning events or circumstances which could cause significant doubts about the ability of the Group to continue operation as a going concern. In case of finding such material uncertainty, we are obliged to draw attention in our auditor's report to the disclosures in the consolidated financial statements relevant to that uncertainty, or, in case these disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, due to future events or circumstances, the Group could suspend its operation as a going concern.
- evaluate the overall presentation, structure and content of the consolidated financial statements, including disclosures, and whether consolidated financial statements present the fundamental transactions and events in a reliable manner.

## **1. Group background activities**

The Center for the Study of Democracy (CSD) is a non-profit organisation domiciled in Bulgaria. The consolidated financial statements of CSD for the year ended 31 December 2020 comprise CSD and its consulting arms Vitosha Research EOOD and Project 1 EOOD (together referred to as the “Group”).

Founded in late 1989, the Center for the Study of Democracy (CSD) is a public policy institute fostering the reform process in Europe through impact on policy and civil society. CSD’s mission is “building bridges between scholars and policy-makers” and as an independent, interdisciplinary think tank it combines a broad range of capacities.

The Center for the Study of Democracy owns 100% of its consulting arms Vitosha Research EOOD and Project 1 EOOD.

Vitosha Research EOOD, established in 2000, is specialised in a wide range of research and consulting fields: social and economic policy; assessment and evaluation studies; economic and political behaviour; market research; and others.

Project 1 EOOD was established in 2003. Its main activity is managing the real estate investments of the Group and project management of the contract research of the Group.

As of 31 December 2020, the Group has 27 employees in professional and management positions, including part-time consultants, and 8 employees in administrative positions as well as 7 employees in maintenance and technical support positions.

The consolidated financial statements were approved by the Governing Board on 14 July 2021.

## **2. Accounting policies**

The principal accounting policies applied in the preparation of these consolidated financial statements are set out below. These policies have been consistently applied to all the years presented, unless otherwise stated.

### **2.1 Basis of preparation**

These consolidated financial statements have been prepared in accordance with the International Financial Reporting Standards (IFRS), as adopted by the European Union. The financial statements have been prepared under the historical cost convention.

The consolidated financial statements comprise the financial statements of the Center for the Study of Democracy and its consulting arms as at 31 December each year. The financial statements of consulting arms are prepared for the same reporting period as the parent Group, using consistent accounting policies. For consolidation purposes, the financial

information of the Group has been combined on a line-by-line basis by adding together like items of assets, liabilities, income and expenses.

All intra-group balances, income and expenses and unrealised gains resulting from intra-group transactions are eliminated in full. Unrealised losses are also eliminated but considered an impairment indicator of the asset transferred. The consulting arms are fully consolidated from the date of acquisition, being the date on which the Group obtains control, and continue to be consolidated until the date on which such control ceases. Accounting policies of the consulting arms have been changed where necessary to ensure consistency with the policies adopted by the Group.

Consulting arms are all entities (including special purpose entities) over which the Group has the power to govern the financial and operating policies generally accompanying a shareholding of more than one half of the voting rights. The existence and effect of potential voting rights that are currently exercisable or convertible are considered when assessing whether the Group controls another entity.

The purchase method of accounting is used to account for the acquisition of consulting arms by the Group. The cost of an acquisition is measured as the fair value of the assets given, equity instruments issued and liabilities incurred or assumed at the date of exchange.

Identifiable assets acquired, and liabilities and contingent liabilities assumed in a business combination are measured initially at their fair values at the acquisition date, irrespective of the extent of any non-controlling interest. The excess of the cost of acquisition over the fair value of the Group's share of the identifiable net assets acquired is recorded as goodwill. If the cost of acquisition is less than the fair value of the net assets of the consulting arm acquired, the difference is recognised directly in the income statement.

After initial recognition, goodwill is measured at cost less any accumulated impairment losses. For the purpose of impairment testing, goodwill acquired in a business combination is, from the acquisition date, allocated to each of the Group's cash-generating units that are expected to benefit from the synergies of the combination, irrespective of whether other assets or liabilities of the acquiree are assigned to those units.

Where goodwill forms part of a cash-generating unit and part of the operation within that unit is disposed of, the goodwill associated with the operation disposed of is included in the carrying amount of the operation when determining the gain or loss on disposal of the operation. Goodwill disposed of in this circumstance is measured based on the relative values of the operation disposed of and the portion of the cash-generating unit retained.

#### *Transactions with non-controlling interests*

Non-controlling interests represent the portion of profit or loss and net assets not held by the Group and are presented separately in the income statement and within equity in the consolidated balance sheet, separately from parent shareholders' equity. Disposals of non-controlling interests result in gains and losses for the Group that are recognised in

the income statement. Acquisitions of non-controlling interests are accounted for whereby the difference between the consideration and the book value of the share of the net assets acquired is recognised in goodwill.

The preparation of the financial statements in accordance with IFRS requires management to make estimates and assumptions. The management relied on their own judgment when applying the accounting policy of the Group. The elements of the financial statements whose presentation includes higher degree of judgment or subjectivity and for which the assumptions and judgments have higher influence are separately disclosed in Note 4.

#### *New and amended standards, adopted by the Group*

New and amended standards and interpretations mandatory for the first time for the financial year beginning on 1 January 2020 are not early adopted by the Group because the management of the Group believes that they are not currently relevant to the Group, although they may affect accounting for future transactions and events.

## **2.2 Foreign currency translations**

### **2.2.1 Functional and presentation currency**

Items included in the financial statements of the Group are measured using the currency of the primary economic environment in which the entity operates (“the functional currency”). The functional and presentation currency is “Bulgarian lev” or “BGN”.

### **2.2.2 Transactions and balances**

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in the income statement.

## **2.3 Property, plant and equipment**

All property, plant and equipment are stated at historical cost less depreciation, less impairment losses, if any. Historical cost includes all expenditure that is directly attributable to the acquisition of the items.

Subsequent costs are included in the assets carrying amount or recognised as a separate asset, only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably.

Depreciation commences from the date the asset is available for use. Land is not depreciated as it is deemed to have an indefinite life. Assets under construction are not depreciated as not yet available for use.

The Group uses straight-line depreciation method. Depreciation rates are based on the useful life of the different types of property, plant and equipment as follows:

Buildings	25 years
Machinery and equipment	3.33 years
Vehicles	4 years
Fixtures and fittings	2 – 6.67 years

Property, plant and equipment is depreciated from the day following the acquisition date and for internally generated assets – from the day following the date of entering into use.

An asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount.

#### **2.4 Intangible assets**

Intangible assets acquired by the Group are presented at cost, less accumulated amortisation and impairment.

##### *Subsequent expenditures*

Subsequent expenditure on capitalised intangible assets is capitalised only when it increases the future economic benefit embodied in the specific asset to which it relates. All other expenditure is expensed as incurred.

Amortisation is charged to the income statement on a straight-line basis over the estimated useful lives of intangible assets, unless such lives are indefinite.

#### **2.5 Financial assets**

The Group classifies its financial assets in the following categories: at fair value through profit or loss, loans and receivables, held-to-maturity investments, and available-for-sale financial assets. The classification depends on the purpose for which the investments were acquired. Management determines the classification of its investments at initial recognition and re-evaluates this designation at every reporting date.

##### *Financial assets at fair value through profit or loss*

Financial assets at fair value through profit or loss are financial assets held for trading. A financial asset is classified in this category if acquired principally for the purpose of selling in the short term. Assets in this category are classified as current assets.

For the purposes of these financial statements short-term means a period within 12 months. During the year, the Group did not hold any investments in this category. The Group does not possess such financial assets as at 31 December 2020.

### *Loans and receivables*

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. They are included in current assets, except for maturities greater than 12 months after the balance sheet date. These are classified as non-current assets. The Group's loans and receivables comprise "trade and other receivables" and "cash and cash equivalents" in the balance sheet. Loans and receivables are carried at amortised cost using the effective interest rate.

### *Held-to-maturity*

Held-to-maturity investments are fixed-maturity investments that the Group's management has the positive intention and ability to hold to maturity. These securities are included as non-current assets except for securities, reaching maturity within 12 months from the balance sheet date and which are recognised as current during the reporting period. During the year, the Group did not hold any investments in this category.

### *Available for sale financial assets*

Available-for-sale financial assets are non-derivatives that are investments acquired with the purpose to be owned for non-fixed period of time, which can be sold when the Group needs recourse or at change of interest rates. They are included in non-current assets unless management intends to dispose of the investment within 12 months of the balance sheet date or to use them as a source of working capital. In this case the investments are classified within current assets. During the year, the Group did not hold any investments in this category.

The Group assesses at each balance sheet date whether there is objective evidence that a financial asset or a group of financial assets is impaired. Impairment testing of trade and other receivables is described in Note 2.7.

## **2.6 Inventory**

Inventories are stated at the lower of cost and net realisable value. Inventories are expensed using the weighted average method. Net realisable value is the estimated selling price in the ordinary course of business, less the estimated costs of completion and selling expenses.

## **2.7 Trade and other receivables**

Trade receivables are recognised initially at fair value and subsequently measured at amortised cost (using effective interest method) less provision for impairment. A provision for impairment of trade receivables is established when there is objective evidence that the Group will not be able to collect all amounts due according to the original terms of receivables.

Significant financial difficulties of the debtor, probability that the debtor will enter bankruptcy or financial reorganisation, and default or delinquency in payments (more than

30 days overdue) are considered indicators that the trade receivable is impaired. The amount of the provision is the difference between the asset's carrying amount and the present value of estimated future cash flows, discounted at the original effective interest rate. The carrying amount of the asset is reduced through the use of an allowance account, and the amount of the loss is recognised in the income statement within "selling and marketing costs". When a trade receivable is uncollectible, it is written off against the allowance account for trade receivables. Subsequent recoveries of amounts previously written off are credited against "selling and marketing costs" in the income statement.

## **2.8 Cash and cash equivalents**

Cash and cash equivalents include cash in hand, deposits held at call with banks, and other short-term highly liquid investments with original maturities of three months or less, as well as bank overdrafts. Bank overdrafts are shown within current borrowings in current liabilities on the balance sheet.

## **2.9 Investment property**

Investment property is property held either to earn rental income or for capital appreciation, or for both, but not for sale in the ordinary course of business, use in the production or supply of goods or services, or for administrative purposes. Investment property is measured at cost on initial recognition and subsequently at fair value with any change therein recognised in profit or loss.

Cost includes expenditure that is directly attributable to the acquisition of the investment property. The cost of self-constructed investment property includes the cost of materials and direct labour, any other costs directly attributable to bringing the investment property to a working condition for its intended use and capitalised borrowing costs.

When the use of a property changes so that it is reclassified as property, plant and equipment, its fair value at the date of reclassification becomes its cost for subsequent accounting.

## **2.10 Borrowings**

Borrowings are recognised initially at fair value, net of transaction costs incurred. Borrowings are subsequently stated at amortised cost; any difference between the proceeds (net of transaction costs) and the redemption value is recognised in the income statement over the period of the borrowings using the effective interest method.

Borrowings are classified as current liabilities unless the Group has an unconditional right to defer settlement of the liability for at least 12 months after the balance sheet date.

Borrowing costs are recognised as an expense in the period in which they are incurred.

## **2.11 Deferred tax**

Deferred income tax is provided in full, using the liability method, on all temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the financial statements. Deferred income tax is determined using tax rates that have been enacted or substantially enacted by the balance sheet date and are expected to apply when the related deferred income tax asset is realised or the deferred income tax liability is settled.

Deferred income tax assets are recognised to the extent that it is probable that future taxable profit will be available against which the temporary differences can be utilised.

## **2.12 Employee benefits on retirement**

In accordance with article 222, para. 3 of the Bulgarian Labour Code, in the event of termination of a labour contract after the employee has reached the lawfully required retirement age, regardless of the reason for the termination, the employee is entitled to a compensation as follows: 2 gross monthly salaries in all cases and 6 gross monthly salaries if the employee has been engaged with the Group for at least 10 years. As at 31 December, the Group has not accounted for those potential obligations.

## **2.13 Revenue recognition**

Revenue comprises the fair value of the consideration received or receivable for the sale of goods and services in the ordinary course of the Group's activities. Revenue is shown net of value-added tax, returns, rebates and discounts and after eliminating sales within the Group.

The Group recognises revenue when the amount of revenue can be reliably measured, it is probable that future economic benefits will flow to the entity and when specific criteria have been met for each of the Group's activities as described below. The amount of revenue is not considered to be reliably measurable until all contingencies relating to the sale have been resolved. The Group bases its estimates on historical results, taking into consideration the type of customer, the type of transaction and the specifics of each arrangement.

### *Sales of services*

Revenue from time and material contracts, typically from delivering certain services, is recognised under the percentage of completion method. Revenue is generally recognised at the contractual rates. For time contracts, the stage of completion is measured on the basis of labour hours delivered as a percentage of total hours to be delivered.

Revenue from fixed-price contracts for delivering certain services is also recognised under the percentage-of-completion method. Revenue is generally recognised based on the services performed to date as a percentage of the total services to be performed.

If circumstances arise that may change the original estimates of revenues, costs or extent of progress toward completion, estimates are revised. These revisions may result in increases or decreases in estimated revenues or costs, and are reflected in income in the period in which the circumstances that give rise to the revision become known by the management.

#### *Revenue from grants and contributions*

Grants from financing bodies are recognised initially as deferred income when there is reasonable assurance that they will be received and that the Group will comply with the conditions associated with the grant. Grants that compensate the Group for expenses incurred are recognised in profit or loss on a systematic basis in the same periods in which the expenses are recognised. Grants that compensate the Group for the cost of an asset are recognised in profit or loss on a systematic basis over the useful life of the asset.

#### *Interest income*

Interest income is recognised on a time-proportion basis using the effective interest method. When a receivable is impaired, the Group reduces the carrying amount to its recoverable amount, being the estimated future cash flow discounted at the original effective interest rate of the instrument, and continues unwinding the discount as interest income. Interest income on impaired loans is recognised using the original effective interest rate.

### **2.14 Dividend distribution**

The Group does not distribute dividends.

## **3. Financial risk management**

### **3.1. Impact of the general economic environment**

In 2020, the global economy was severely hit by the COVID-19 pandemic. As a result of constraints on the free movement of people and goods and the rise of unemployment, all EU member states, including Bulgaria, went into a deep recession. The shock of anti-epidemic measures was mitigated by a considerable slackening of cash and budgetary restriction both globally and in the EU. The Bulgarian government was no exception, although the measures it took were narrower in scope. The COVID crisis is expected to dominate global economic activity as the major factor for the next couple of years. Bulgaria's economic growth prospects, both short and mid-term, remain uncertain. They are exacerbated by the political crisis in the country caused by failed attempts to form a regular government.

In May 2020, the EU proposed a Recovery and Resilience Plan to tackle the economic and social damages incurred by the COVID-19 pandemic. The plan was partially covered by re-allocations in the European Commission's budget. Thus, some of the EU funds to which the

Group was beneficiary have also been restructured and resources redirected to overcoming the health crisis and the consequences of the pandemic. This could reduce the Group's opportunities to apply for funding of the topics at the core of its analytical work. This type of risk will also be heightened for the period 2021 – 2022 by the EU's transition to a new programming period and the ensuing delay of announcing new funding opportunities. On the other hand, the Group is implementing over 10 actions under the Horizon 2020 program (whose total budget equals EUR 80 billion), while the budget of its successor in the next 7-year programming period – Horizon Europe – amounts to the record EUR 95.5 billion. This fact is likely to have a positive effect on the Group's activities.

The future economic direction of Bulgaria is largely dependent upon the effectiveness of economic, financial and monetary measures undertaken by the Government of Bulgaria, together with tax, legal, regulatory and political developments. Internal political instability stayed high in 2020. Bulgaria has continued with its Eurozone and Schengen bid, and these processes are expected to continue facing difficulties and deviations from plan.

In 2020, as a next step to adopting the Euro, Bulgaria joined ERM II – the EU's exchange rate mechanism – in order to advance its economy's accession to the Eurozone. The Euro is currently the second ranking global reserve currency after the US dollar. The country will most likely adopt the Euro in 2024, which is expected to enhance foreign investments and possibly affect organisations such as the Group in a positive way. Over 50% of the funds of the Group are in its Euro bank accounts. Since 1 October 2020, the European Central Bank has been exercising direct supervision over the key credit institution in Bulgaria. The Group's bank accounts are in institutions present on this supervision list, which is an additional source of security.

The management is unable to predict all developments which could have an impact on the sector and wider economy, and consequently what effect, if any, they could have on the future financial position of the Group. However, the management's analysis shows that for the short to mid-term the risks are balanced and the general environment is likely to remain largely favourable for the development of the Group. The management will continue to monitor these risks on a regular basis and take all necessary measures to support the sustainability and development of the Group's business in the current circumstances.

### **3.2. Financial risk factors**

The risk exposures of the Group could be determined as follows: market risk (including currency risk, price risk and risk of future cash flow changes as a result of changes in market interest rate), credit risk and liquidity risk. The Group's management focuses on the financial risk and seeks to minimise potential adverse effects on the Group's financial performance.

### **3.2.1. Market risk**

#### *Currency risk*

The Group is not exposed to serious foreign exchange risk as most of its activities are denominated in EUR. The exchange rate of the BGN is currently pegged to the EUR. In 2020, the group had minor exposure to USD denominated projects and although the slightly negative trend of the exchange rate USD/BGN resulted in a small foreign exchange loss, it did not affect significantly the financial position of the Group.

The Group's management does not believe that the peg will change within the next 12 months and therefore no sensitivity analysis has been performed.

#### *Price risk*

The Group's management considers the price risk in the context of the future revenues that are expected to be generated in the operating activity of the Group.

### **3.2.2. Cash flow and fair value interest rate risk**

The Group increased its interest-bearing assets and due to the zero rate of interest policy of the banks this is unlikely to result in higher revenues and could even lead to risks of penalty interest for excessive liquidity because overall bank liquidity leads to increase of their costs for maintenance of the available cash. The Group analyses its interest rate exposure on a dynamic basis and addresses the underlying risk.

### **3.2.3. Credit risk**

Credit risk arises from cash and cash equivalents and deposits with banks and financial institutions.

### **3.2.4. Liquidity risk**

In the context of its underlying activities, the Group is able to maintain flexibility in funding and to use credit lines, overdrafts and other credit facilities if necessary.

The table below analyses the Group's financial liabilities into relevant maturity groupings based on the remaining period at the balance sheet to the contractual maturity date. The amounts disclosed in the table are the contractual undiscounted cash flows. Balances due within 12 months equal their carrying balances, as the impact of discounting is not significant.

*Center for the Study of Democracy (The Group)*  
*Notes to the Consolidated Annual Financial Statements, 31 December 2020*  
*(all amounts in BGN thousand, unless otherwise stated)*

As of 31 December 2020	Up to 1 year	Between 1 and 2 years	Between 2 and 5 years	Over 5 years
Trade and other payables	30	–	–	–
As of 31 December 2019	Up to 1 year	Between 1 and 2 years	Between 2 and 5 years	Over 5 years
Trade and other payables	814	–	–	200

#### 4. Critical accounting estimates and judgements

Estimates and judgements are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. The authenticity of accounting estimates and judgments is monitored regularly.

The Group makes estimates and assumptions concerning the future. The resulting accounting estimates will, by definition, seldom equal the related actual results. The estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are addressed below:

##### *Useful life of property, plant and equipment*

The presentation and valuation of property, plant and equipment requires the management to estimate their useful life and remaining value. The management assesses at the end of each accounting period the determined useful life of the property, plant and equipment.

##### *Impairment of loans and receivables*

Impairment of receivables is determined based on management's expectations for the collectability of the loans and receivables. As at the date of preparation of the financial statements, the management reviews and assesses the existing receivables' balances for collectability.

## 5. Property, plant and equipment

Cost	As of 31 December 2019	Additions	Disposals	As of 31 December 2020
Land	413	–	–	413
Computers	268	19	–	287
Vehicles	243	–	–	243

Others	133	419	–	552
<b>Total</b>	<b>136</b>	<b>419</b>	<b>–</b>	<b>555</b>

## 7. Investment property

	For the year ending:	
	31 December 2020	31 December 2019
<b>As of 1 January</b>		
Carrying amount at the beginning of the period	418	354
Depreciation charge	(5)	64
<b>Carrying amount at the end of the period</b>	<b>413</b>	<b>418</b>
<b>As of 31 December</b>		
Cost	511	513
Accumulated depreciation	(98)	(95)
<b>Carrying amount</b>	<b>413</b>	<b>418</b>

Investment properties of the Group consist of land and buildings acquired in the period 2005 – 2006. Investment property is presented at cost less accumulated depreciation and impairment losses.

## 8. Loan, trade and other receivables

	For the year ending:	
	31 December 2020	31 December 2019
<b>Short-term receivables</b>		
Trade receivables	368	313
Less: impairment provision of trade payables	–	–
Trade receivables, net	<b>368</b>	<b>313</b>
VAT refund	54	–
Other	3	5
<b>Total receivables</b>	<b>425</b>	<b>318</b>
	For the year ending:	
	31 December 2020	31 December 2019
<b>Loan receivables</b>		
Long-term loan	122	–
Short-term loan	–	122
Less: impairment provision of trade payables	–	–
<b>Total long-term receivables</b>	<b>122</b>	<b>122</b>

The carrying amount of trade and other receivables approximates their fair value.

## 9. Cash and cash equivalents

	For the year ending:	
	31 December 2020	31 December 2019
Cash at hand	17	10
Cash in bank current accounts	4,786	6,027
<b>Total cash and cash equivalents</b>	<b>4,803</b>	<b>6,037</b>

## 10. Trade and other payables

	For the year ending:	
	31 December 2019	31 December 2019
<b>Short-term liabilities</b>		
Payables to suppliers	1	40
Salaries and social security payables	14	12
Corporate tax payables	6	105
Other	9	657
<b>Total short-term liabilities</b>	<b>30</b>	<b>814</b>

## 11. Deferred financing
